Corpus Linguistics, Context and Culture Viola Wiegand 2019-11-18
Corpus Linguistics, Context and Culture demonstrates the potential of corpus linguistic methods for investigating language patterns across a range of contexts. Organised in three sections, the chapters range from detailed case studies on lexicogrammatical patterns to fundamental discussions of meaning as part of the 'discourse, contexts and cultures' theme. The final part on 'learner contexts' specifically emphasises the need for mixed-method approaches and the consideration of pedagogical implications for real world contexts. Beyond its contribution to current

debates in the field, this edited volume indicates new directions in cross-disciplinary work.

Creating a Missional Culture JR Woodward 2013-09-20 Missiologist and church planter JR Woodward offers a blueprint for the missional church-- not small adjustments around the periphery of the infrastructure but a radical revisioning of how a church ought to look that entails changing how we think about leadership and what we expect out of discipleship.

Emotions in Crosslinguistic

Perspective Jean Harkins 2001-01-01

This volume aims to enrich the current interdisciplinary theoretical discussion of human emotions by

presenting studies based on extensive linguistic data from a wide range of languages of the world. Each language-specific study gives detailed semantic descriptions of the meanings of culturally salient emotion words and expressions, offering fascinating insights into people's emotional lives in diverse cultures including Amharic, Chinese, German, Japanese, Lao, Malay, Mbula, Polish and Russian. The book is unique in its emphasis on empirical language data, analyzed in a framework free of ethnocentrism and not dependent upon English emotion terms, but relying instead on independently established conceptual universals. Students of languages and cultures, psychology and cognition will find this volume a rich resource of description and analysis of

emotional meanings in cultural context.

Words and Meanings Cliff Goddard 2014

This book presents cross-linguistic and cross-cultural investigations of word meaning from different domains of the lexicon - concrete, abstract, physical, sensory, emotional, and social. The words they consider are complex, culturally important, and basic, in a range of languages that includes English, Russian, Polish, French, Warlpiri and Malay.

Minimal English for a Global World

Cliff Goddard 2017-10-03 This book introduces a new tool for improving communication and promoting clearer thinking in a world where the use of Global English can create numerous comprehension and communication issues. Based on research findings from cross-linguistic semantics, it

contains essays and studies by leading experts exploring the value and application of 'Minimal English' in various fields, including ethics, health, human rights discourse, education and international relations. In doing so, it provides informed guidelines and practical advice on how to communicate in clear and cross-translatable ways in Minimal English. This innovative edited collection will appeal to students and scholars of applied linguistics, language education and translation studies.

Studies in Ethnopragmatics, Cultural Semantics, and Intercultural Communication Kerry Mullan 2019-10-24

This book is the first in a three-volume set that celebrates the career and achievements of Cliff Goddard, a pioneer of the Natural Semantic

Metalinguage approach in linguistics. In addition, it explores ethnopragmatics and conversational humour, with a further focus on semantic analysis more broadly. Often considered the most fully developed, comprehensive and practical approach to cross-linguistic and cross-cultural semantics, Natural Semantic Metalinguage is based on evidence that there is a small core of basic, universal meanings (semantic primes) that can be expressed in all languages. It has been used for linguistic and cultural analysis in such diverse fields as semantics, cross-cultural communication, language teaching, humour studies and applied linguistics, and has reached far beyond the boundaries of linguistics into ethnopsychology, anthropology, history, political

science, the medical humanities and ethics.

Italian Discourse Gian Marco Farese 2019-11-15 Using the Natural Semantic Metalinguage methodology, Gian Marco Farese presents a comprehensive analysis of the most important Italian cultural keywords and cultural scripts that foreign learners and cultural outsiders need to know to become linguistically and culturally proficient in Italian. Farese focuses on the words and speech practices that are used most frequently in Italian discourse and that are uniquely Italian: both untranslatable into other languages and reflective of salient aspects of Italian culture and society. *Italian Discourse: A Cultural Semantic Analysis* sheds light on ways in which the Italian language is related to

Italians' character, values, and way of thinking, and it does so in contrastive perspective with English. Each chapter focuses on a cultural keyword, tracing the term through novels, plays, poems, and songs. Italian Discourse will be an important resource for anyone interested in Italian studies and Italian linguistics, as well as in semantics, cultural studies, linguistic anthropology, cognitive linguistics, intercultural communication, and translation.

Experimental Techniques in Plant

Disease Epidemiology Jürgen Kranz
2012-12-06 Most books on epidemiology have treated the subject from a statistical, mathematical or computer applicational point of view. However, experiments must be performed first to provide the data for models which

in turn can then be proven by further experimentation. This mutual interplay of theory and empirics gives epidemiology its scientific thrust and charm. This book provides a choice of methods for varying applications and objectives, covering all important aspects for the designing of experiments.

Furthermore, the reader is supplied with solutions to his experimental problems and many "tricks of the trade". The newcomer to the field will also profit by this methodology guide.

A World of Indigenous Languages

Teresa L. McCarty 2019-03-13 Spanning Indigenous settings in Africa, the Americas, Aotearoa/New Zealand, Australia, Central Asia and the

Nordic countries, this book examines the multifaceted language reclamation work underway by Indigenous peoples throughout the world. Exploring political, historical, ideological, and pedagogical issues, the book foregrounds the decolonizing aims of contemporary Indigenous language movements inside and outside of schools. Many authors explore language reclamation in their own communities. Together, the authors call for expanded discourses on language planning and policy that embrace Indigenous ways of knowing and forefront grassroots language reclamation efforts as a force for Indigenous sovereignty, social justice, and self-determination. This volume will be of interest to scholars, educators and students in applied linguistics,

Ethnic/Indigenous Studies, education, second language acquisition, and comparative-international education, and to a broader audience of language educators, revitalizers and policymakers.

Exploring Intercultural Communication

Zhu Hua 2018-07-17 Exploring Intercultural Communication investigates the role of language in intercultural communication, paying particular attention to the interplay between cultural diversity and language practice. This second edition increases and updates the coverage on emerging key topics, including symbolic power, communicative turbulence, conversational inequality, stereotypes, racism, Nationality and Ethnicity talk and the impact and role of technology in intercultural

communication. Including global examples from a range of genres, this book is an indispensable resource for students taking language and intercultural communication modules within applied linguistics, TESOL, education or communication studies courses.

The Elgar Companion to Recent Economic Methodology J. B. Davis
2011-01-01 Economic methodology has traditionally been associated with logical positivism in the vein of Milton Friedman, Karl Popper, Imre Lakatos and Thomas Kuhn. However, the emergence and proliferation of new research programs in economics have stimulated many novel developments in economic methodology. This impressive Companion critically examines these advances in methodological thinking, particularly those that are

associated with the new research programs which challenge standard economic methodology. Bringing together a collection of leading contributors to this new methodological thinking, the authors explain how it differs from the past and point towards further concerns and future issues. The recent research programs explored include behavioral and experimental economics, neuroeconomics, new welfare theory, happiness and subjective well-being research, geographical economics, complexity and computational economics, agent-based modeling, evolutionary thinking, macroeconomics and Keynesianism after the crisis, and new thinking about the status of the economics profession and the role of the media in economics. This

important compendium will prove invaluable for researchers and postgraduate students of economic methodology and the philosophy of economics. Practitioners in the vanguard of new economic thinking will also find plenty of useful information in this path-breaking book.

Cultural Keywords in Discourse

Carsten Levisen 2017-10-15 Cultural keywords are words around which whole discourses are organised. They are culturally revealing, difficult to translate and semantically diverse. They capture how speakers have paid attention to the worlds they live in and embody socially recognised ways of thinking and feeling. The book contributes to a global turn in cultural keyword studies by exploring keywords from discourse communities

in Australia, Brazil, Hong Kong, Japan, Melanesia, Mexico and Scandinavia. Providing new case studies, the volume showcases the diversity of ways in which cultural logics form and shape discourse. The Natural Semantic Metalanguage (NSM) approach is used as a unifying framework for the studies. This approach offers an attractive methodology for doing explorative discourse analysis on emic and culturally-sensitive grounds. Cultural Keywords in Discourse will be of interest to researchers and students of semantics, pragmatics, cultural discourse studies, linguistic ethnography and intercultural communication.

Anglistics in Lithuania Jonė

Grigaliūnienė 2013-11-01 This collection of papers offers diverse yet highly professional accounts of multiple cross-linguistic and cross-cultural aspects of English studies in Lithuania. It is valuable for the wide variety of empirical data presented, for the insights into both English and Lithuanian, which, when studied individually, sometimes cannot escape a narrower treatment. Most of the essays in this volume deal with semantics, pragmatics and grammar, while others focus on phonetics and language pedagogy. The collection is also notable for its use of various different methodologies, including triple CL – corpus linguistic, cognitive linguistic and contrastive linguistic – principles of investigation. A particular strength of the book is

its focus on the contrastive aspect of study. Further, many of the contributions included here have profound implications for both translation and teaching.

English Anna Wierzbicka 2006-04-27 It is widely accepted that English is the first truly global language and lingua franca. Anna Wierzbicka, the distinguished linguist known for her theories of semantics, has written the first book that connects the English language with what she terms "Anglo" culture. Wierzbicka points out that language and culture are not just interconnected, but inseparable. She uses original research to investigate the "universe of meaning" within the English language (both grammar and vocabulary) and places it in historical and geographical perspective. This engrossing and

fascinating work of scholarship should appeal not only to linguists and others concerned with language and culture, but the large group of scholars studying English and English as a second language.

The Oxford Handbook of Christology

Francesca Aran Murphy 2015 The Oxford Handbook of Christology brings together 40 authoritative essays considering the theological study of the nature and role of Jesus Christ. This collection offers dynamic perspectives within the study of Christology and provides rigorous discussion of inter-confessional theology, which would not have been possible even 60 years ago. The first of the seven parts considers Jesus Christ in the Bible. Rather than focusing solely on the New Testament, this section begins with discussion

of the modes of God's self-communication to us and suggests that Christ's most original incarnation is in the language of the Hebrew Bible. The second section considers Patristics Christology. These essays explore the formation of the doctrines of the person of Christ and the atonement between the First Council of Nicaea in 325 and the eve of the Second Council of Nicaea. The next section looks at Medieval theology and tackles the development of the understanding of who Christ was and of his atoning work. The section on "Reformation and Christology" traces the path of the Reformation from Luther to Bultmann. The fifth section tackles the new developments in thinking about Christ which have emerged in the modern and the postmodern eras, and the sixth

section explains how beliefs about Jesus have affected music, poetry, and the arts. The final part concludes by locating Christology within systematic theology, asking how it relates to Christian belief as a whole. This comprehensive volume provides an invaluable resource and reference for scholars, students, and general readers interested in the study of Christology.

Cognitive Exploration of Language and Linguistics René Dirven 2004-06-30

Cognitive Exploration of Language and Linguistics is designed as a comprehensive introductory text for first and second-year university students of language and linguistics. It provides a chapter on each of the more established areas in linguistics such as lexicology, morphology, syntax, phonetics and phonology,

historical linguistics, and language typology and on some of the newer areas such as cross-cultural semantics, pragmatics, text linguistics and contrastive linguistics. In each of these areas language is explored as part of a cognitive system comprising perception, emotion, categorisation, abstraction processes, and reasoning. All these cognitive abilities may interact with language and be influenced by language. Thus the study of language in a sense becomes the study of the way we express and exchange ideas and thoughts. This Second Revised Edition is corrected, updated and expanded. Cognitive Exploration of Language and Linguistics is clearly presented and organized after having been tested in several courses in various countries.

Includes exercises (solutions to be found on the Internet).

English Speech Act Verbs Anna Wierzbicka 1987

Peace Child Don Richardson 2005-08-08
From Cannibals to Christ-Followers--A True Story In 1962, Don and Carol Richardson risked their lives to share the gospel with the Sawi people of New Guinea. Peace Child tells their unforgettable story of living among these headhunters and cannibals, who valued treachery through fattening victims with friendship before the slaughter. God gave Don and Carol the key to the Sawi hearts via a redemptive analogy from their own mythology. The "peace child" became the secret to unlocking a value system that had existed through generations. This analogy became a stepping-stone by which the

gospel came into the Sawi culture and started both a spiritual and a social revolution from within. With an epilogue updating how the gospel has impacted the Sawi people, this missionary classic will inspire a new generation of readers who need to hear this remarkable story and the lessons it teaches us about communicating Christ in a meaningful way to those around us.

Ten Lectures on Natural Semantic MetaLanguage Cliff Goddard 2018-03-20
These lively lectures introduce the theory, practice and application of a versatile, rigorous and non-Anglocentric approach to cross-linguistic semantics. Topics include semantic primes and molecules, emotions, evaluation, verbs and event structure, cultural key words and scripts, language teaching.

The German Right, 1860-1920 James N. Retallack 2006 With unification as a nation state under Bismarck in 1871, Germany experienced the advent of mass politics. The dynamic political culture that emerged challenged the adaptability of the 'interlocking directorate of the Right.' This work examines how the authoritarian imagination inspired the Right and how political pragmatism constrained it.

Pragmatics of Discourse Klaus P. Schneider 2014-06-18 Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic

perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while

also presenting new research findings.

Karl Rahner, Culture and

Evangelization Anthony Mellor
2019-05-15 In Karl Rahner, Culture and Evangelization, Anthony Mellor outlines a process of contemporary evangelisation which seeks to develop modes of public “mystagogical conversation” by engaging the religious imagination and draw upon personal experiences of transcendence and religious sensibility.

Meaning, Life and Culture Helen Bromhead 2020-12-17 This book is dedicated to Anna Wierzbicka, one of the most influential and innovative linguists of her generation. Her work spans a number of disciplines, including anthropology, cultural psychology, cognitive science, philosophy and religious studies, as

well as her home base of linguistics. She is best known for the Natural Semantic Metalanguage (NSM) approach to meaning—a versatile tool for exploring ‘big questions’ concerning the diversity and universals of people’s experience in the world. In this volume, Anna Wierzbicka’s former students, old and current colleagues, ‘kindred spirits’ and ‘sparring partners’ engage with her ideas and diverse body of work. These authors cover topics from the grammar of action verbs to cross-cultural pragmatics, and over 30 languages from around the world are represented. The chapters in Part 1 focus on the NSM approach and cover four themes: lexico-grammatical semantics, cultural keywords, semantics of nouns, and emotion. In Part 2, the contributors connect with

a meaning-based approach from their own intellectual perspectives, including syntax, anthropology, cognitive linguistics and sociolinguistics. The deep humanistic perspective, wide-ranging themes and interdisciplinary nature of Wierzbicka's research are reflected in the contributions. The common thread running through all chapters is the primacy of meaning to the understanding of language and culture.

Jews and Muslims Made Visible in Christian Iberia and Beyond, 14th to 18th Centuries 2019-05-06 This volume aims to show through various case studies how the interrelations between Jews, Muslims and Christians in Iberia were negotiated in the field of images, objects and architecture during the Later Middle

Ages and Early Modernity.
Honor Among Christians David F. Watson David F. Watson brings a new perspective to the "messianic secret," relying not on the Christological concerns of 19th- and 20th-century theologians, but on recent insights into the role of honor and shame in ancient Mediterranean culture on the part of social scientists. Mark's portrayal of Jesus simultaneously shows his ability to provide favors and benefits to others and his refusal to put himself forward or draw attention to himself as a benefactor, thereby teaching that in God's kingdom it is not the great and powerful who are most highly regarded, but the humble.
Globalization and Development Nezameddin Faghih 2019-04-29 Over time, globalization has evolved into

a shared journey of humanity, involving entrepreneurship, innovation, business and policy advances around the world. This book explores the link between globalization and development, and reveals the dynamics, strengths and weaknesses, trends in and implications of globalization in Asia and Africa. Presenting papers by respected experts in the field, it shares essential insights into the status quo of globalization processes and structures, identifies the opportunities and threats that globalization faces, and sheds light on the path to global peace. Topics range from using fair-trade practices to compensate for the impacts of globalization; to lessons learned for tomorrow from Tunisia, Morocco and Jordan; as well as emergent topics

such as global entrepreneurship capacity and developing the Chinese economy overseas. Keywords for American Cultural Studies, Second Edition Bruce Burgett 2014-12-19 Since its initial publication, scholars and students alike have turned to Keywords for American Cultural Studies as an invaluable resource for understanding key terms and debates in the fields of American studies and cultural studies. As scholarship has continued to evolve, this revised and expanded second edition offers indispensable meditations on new and developing concepts used in American studies, cultural studies, and beyond. It is equally useful for college students who are trying to understand what their teachers are talking about, for general readers who want to know

what's new in scholarly research, and for professors who just want to keep up. Designed as a print-digital hybrid publication, Keywords collects more than 90 essays—30 of which are new to this edition—from interdisciplinary scholars, each on a single term such as “America,” “culture,” “law,” and “religion.” Alongside “community,” “prison,” “queer,” “region,” and many others, these words are the nodal points in many of today's most dynamic and vexed discussions of political and social life, both inside and outside of the academy. The Keywords website, which features 33 essays, provides pedagogical tools that engage the entirety of the book, both in print and online. The publication brings together essays by scholars working in literary studies and political

economy, cultural anthropology and ethnic studies, African American history and performance studies, gender studies and political theory. Some entries are explicitly argumentative; others are more descriptive. All are clear, challenging, and critically engaged. As a whole, Keywords for American Cultural Studies provides an accessible A to Z survey of prevailing academic buzzwords and a flexible tool for carving out new areas of inquiry. Visit keywords.nyupress.org for online essays, teaching resources, and more.

Semantic Primes and Universal Grammar
Bert Peeters 2006-01-01 This volume is part of a research program which started with the publication, in 1972, of Anna Wierzbicka's groundbreaking work on Semantic

Primitives. The first within the program to focus on a number of typologically similar languages, it proposes a French, Spanish, Portuguese and Italian version of the Natural Semantic Metalanguage (NSM) elaborated over the years by Wierzbicka and colleagues. Repetition is avoided through teamwork: a number of authors working on the languages under examination have had equal input in a set of five papers dealing with distinct parts of the metalanguage. Some of the findings presented here invite us to have a fresh look at what has already been achieved, and to amend some of the working hypotheses of the NSM approach accordingly. The volume also contains six case studies (on Italian sfogarsi, Portuguese saudades, Spanish crisis, French certes,

Spanish expressions of sincerity and Italian and Spanish diminutives, respectively).

Figurative Language Dmitrij Dobrovol'skij 2005 The aim of this study is to discover basic principles underlying linguistic figurativeness and to develop a theory that is capable of capturing conventional figurative language (referred to as CFLT - Conventional Figurative Language Theory). This study analyses idioms, proverbs, lexicalised metaphors, and figurative compounds, drawn from ten standard languages.

Re-thinking Diversity Cordula Braedel-Kühner 2015-12-01 This volume entails a collection of new ideas, themes and questions towards a phenomenon which we are used to refer to with the key term "diversity". The aim of the book is to offer a

cultural sciences perspective on “diversity”, to advance knowledge about it and enrich the dialogue between academics and practitioners in related domains of action. Today, changes in the demographic structures of the population, the migration flux, multiculturalism, the rising awareness concerning minorities’ rights, gender studies and so on lead to a complex picture of what “diversity” means. The narrative of a society and of most organizations is constituted by multiple layers of social categorization, segregation and identity. Therefore, “diversity” defies simple definition. The contributions in this volume approach the phenomenon from different angles and reveal new theoretical, methodological and practical perspectives on it.

Experience, Evidence, and Sense Anna Wierzbicka 2010 "Focusing on a handful of English words whose meaning seems obvious to native speakers, and using a brand of semantic analysis accessible to any intelligent lay person, Anna Wierzbicka reveals the empiricist worldview embedded in the English lexicon and shows how mystify-ingly foreign English can thus be to foreigners. As an exploration in historical semantics, Wierzbicka's new book deserves a place beside Raymond Williams's *Keywords*."---J. M. Coetzee, University of Adelaide, Nobel Laureate in Literature -- *Kintu* Jennifer Nansubuga Makumbi 2018-01-25 In this epic tale of fate, fortune and legacy, Jennifer Makumbi vibrantly brings to life this corner of Africa and this colourful family

as she reimagines the history of Uganda through the cursed bloodline of the Kintu clan. The year is 1750. Kintu Kidda sets out for the capital to pledge allegiance to the new leader of the Buganda kingdom. Along the way he unleashes a curse that will plague his family for generations. Blending oral tradition, myth, folktale and history, Makumbi weaves together the stories of Kintu's descendants as they seek to break free from the burden of their past to produce a majestic tale of clan and country – a modern classic.
