The Vacuum Cleaner

Carroll Gantz 2012-09-19

House cleaning has been an innate human activity forever but only since

the early 19th century have mechanical devices replaced the physical

labor (performed mostly by women). Mechanical carpet sweepers were

replaced by manual suction cleaners, which in turn were replaced by

electric vacuum cleaners in the early 20th century. Innovative

inventors, who improved vacuum cleaners as electricity became

commonly available, made these advances possible. Many early manufacturers

failed, but some, such as Bissell, Hoover, Eureka and others,

became household names as they competed for global dominance with

improved features

performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.
