The AFib Cure John D. Day 2021-02-16 Most doctors will tell you that there isn't much you can do to treat atrial fibrillation, aside from taking medications for the rest of your life. Cardiologists and a-fib specialists John D. Day and T. Jared Bunch disagree. Atrial fibrillation strikes one in four American adults. Not only do people suffering from this condition suffer from shortness of breath, fatigue, chest discomfort, decreased ability to exercise and do activities of daily living, arrhythmia, and palpitations, but their risk of a stroke, cognitive decline and dementia, heart failure, or premature death also shoots way up. Today, a whole new body of research—one most physicians are unaware of—shows that biomarker and lifestyle optimization may put half the cases of atrial fibrillation into remission without drugs or procedures. And for those in whom these remedies are insufficient or not tolerated, new procedures, in combination with biomarker and lifestyle optimization, may offer lifetime remission from atrial fibrillation and its devastating consequences. In clear, accessible, patient-centric language, Drs. Day and Bunch share their revolutionary approach to treating atrial fibrillation, developed through a combined 53 years working with a-fib patients. The effectiveness of their plan has been proven through countless medical studies. And now, in *The AFib Cure: Get Off Your Medications, Take Control of Your Health, and Add Years to Your Life*, they share that plan with you. If you're looking for a drug-free solution to your atrial fibrillation, or have a family history of atrial fibrillation and don't want to suffer the same fate, *The AFib Cure* is for you. Let *The AFib Cure* show you how to live longer, healthier, free from medications, and free from the fear of atrial fibrillation overshadowing your life.

Success Without College Linda Lee 2001-11-28 If your child seems indecisive about college, don't read the riot act, read this landmark book instead. College is not the only alternative. A *New York Times* editor and concerned parent tells you why and helps you to find happy alternatives to starting college before your child is ready. As an educated, committed parent, Linda Lee harbored the usual expectation of a prestigious college degree as the illustrious preface to a top-flight career for her child. Some fifty thousand dollars and several disastrous report cards later, Lee recognized that her seemingly rational expectations were proving far-fetched and that her son was simply not ready for college. Moreover, she was shocked to discover that his experience was not the exception but the rule; only 26 percent of students receive a bachelor's degree within five years. Why, then, are parents led to believe that their children must go to college immediately and that it is the right choice for everyone? If not attending college worked for Bill Gates, Harry S. Truman, Thomas Edison, and William Faulkner, why can't it work for your child and what are your alternatives? *Success Without College* is a groundbreaking book that reveals the surprising facts of why many bright kids are not suited for college (or at least not right after high school). Lee's accessible, knowledgeable style informs parents why this should be more a source of pride than shame by providing profiles of students and parents from around the country and their creative, positive solutions to the college dilemma. With a college education now costing an average of a hundred thousand dollars, maybe it's time for American parents to reconsider: Do you

really need college to succeed?

How to Write and Self-Publish Your First Novel Paul Dorset 2011-09-01

Writing and publishing your first novel is tough. It usually takes a long time. Years for most people. It can be soul destroying too. You finally complete your manuscript; you send off samples to agents and publishers, and anxiously watch the mail for the responses. Then they come in, one at a time, rejection after rejection. How do I know this? I've been there. Does this mean I was a bad writer? No, but I could have used some help in those early days. Sure, I had purchased a few books on writing and I had tried to pay attention to the advice they gave, but there were so many of them and sometimes advice seemed to conflict other advice. It was way too much to take in. But I

persevered with my writing and now I have been writing for several years and I have completed several novels and other books, and my writing is a lot better. My early novels could still do with some major re-editing (which they will be finally getting this summer), but my later works, oh wow I can spot the differences! So, a few months ago I decided I would go the self-publishing route to getting my books out there in the big world. Things are changing in the book markets and so many people now have Kindles and Nooks and iPads and other electronic book readers. I thought to myself, why not do it myself? I know I can write; I have that confidence. Enough complete strangers have told me they like what I write, so why shouldn't I join that list of published authors? And why should I have to wait for some agent or publisher to take a chance on an unknown author before I get published? So I did it, and now I have the story to tell and the method you can use to generate your own success. This ebook is a series of essays solely concerned with improving your writing skills and getting your first novel successfully self-published. It is written in a way that you can keep dipping into it, and keep coming back to parts of it, time and time again. It is concise and to the point and it is written from experience; thousands of hours of experience. Every essay in this book is relevant and has a purpose. Every essay will give you pause for thought. Can I turn you into a bestselling author? No - only you can do that. But I can set you on a path to success. I can give you clear guidelines about what not to do, and how to do things better. And I can tell you exactly how to self-publish that novel. This ebook takes your novel from the beginning and leads you along a path of self-discovery. When you have finished reading you will be Writing for Success and be someone who has a better chance than most every other wannabe author out there of becoming the next Tom Clancy, JK

Rowling, Stephen King, or whoever else is your writing hero. Good luck!

10 Secrets to Success in the World of Work Daniel F. Akrofi 2018-12-24 This book talks about success in your work because success has often been misunderstood. First of all, the greatest enemy of success is the fear of failure. Some individuals are dead afraid to pursue success in their work because they believe they might fail so they don't launch out for it. But I assure you, what you don't have the desire for you cannot partake of so your conscious effort to pant after success is the only sure way to partake in it. This book reveals to you the secrets to an everlasting success story in your work of which when applied, generations yet unborn will come to appreciate the mark you left. Furthermore, success is the potential destiny of all created things. Every seed you plant has a tree in it and the potential success of that tree is in that seed and that is exactly the way you are. Success is measured by why God created you and therefore success is fulfilled purpose. Success is not measured by what you have done compared to what others have done, No. not one bit. So it is needless to measure your success with how hard you compete with other people who have different purposes to that of yours. The fact of the matter is that, you will always find someone less than you (as this book establishes in one of its chapters) so you will think you are successful. Success therefore should not be measured at all with what you have done compared to what others have done. Success must be measured by what you have done compared to what you should and could have done in your stay on earth. The

only two persons who know how successful you are is you and God who created you to be on this planet (earth). The race in God's scheme of things is not to the swift, you don't come first because you are head, but the race is those who endure finishing what they started. That's success. Therefore living on your purpose and finishing it is all that success is about. When you look back to the failures of this year, you know something didn't go right somehow somehow. You might think of something you didn't accomplish. You might have failed in doing something you really wanted to do and your goals were not fulfilled and you can look back and be depressed but looking behind you doesn't help you for the future. And looking ahead of you can really make you afraid because you look at the uncertainty and ask yourself whether you will succeed but I come to tell you today that what is important is what is in you now. God has placed in you everything you need to become all were are born to be and you are carrying it right now as you read this. The word of God puts it wonderfully in the book of Ephesians: Now unto Him that is able to do exceeding abundantly above all that we ask or think according to the power that worketh in us [3:20]. He placed the power inside of you and that means whatever you are born to do and become is on the inside of you. Striking topics such as overcoming temptations, integrity, the need for high emotional quotient, the place sacrifice has in your work, time management, how spirituality affects your work among many other revelations. It is very crucial to understand that there are some things God wants done in you that is why you shouldn't be going about making plans without spending time with God. Take my word for it, you are not smart enough to figure out your future but God knows your future long before you were created. That is why He wants you to know His purpose so that your plans can be in keeping with His purpose. What a tragedy it will be to be successful in the wrong thing. It's like an eagle trapped in its egg. If that eagle never hatches to fly, it is a failure because it never fulfilled its purpose. That is exactly what success is about. It is not just existing, it is making it to the end of why you were born into this earth. This book therefore explores 10 striking secrets that when followed, will steer you to the end, resulting in a successful work life which in turn will lead to a fruit

Success Metrics Martin Klubeck 2017-02-09 Learn how to measure success at the individual and organizational levels. By measuring success in multiple dimensions using multivariate methods you will be able to determine what works and what doesn't. The key is to measure and promote progress in terms of organizational vision, mission, and overarching goals. Business leaders too often succumb to the working assumption that they only have to show shareholders and boards of trustees that they are turning a profit—the higher the profit, the more successful their stewardship of the company. Wrong! To truly thrive and endure, all organizations—corporate, government, small, large, nonprofit, or startup—need to define and pursue the underlying purpose for their existence. To measure success, leaders today are missing a key meta-analytic in their toolbox. In this book, metrics consultant Martin Klubeck provides it to them. Success Metrics steps you through the process of identifying and combining the right measures to gauge, narrate, and guide your organization's progress toward true success. All organizations have a common goal to be successful. All leaders want to make data-informed decisions and use measures to improve processes, communicate progress, and gain support. The problem is that proxy or partial measures don't measure overall success and can be misleading. They measure performance parameters, progress on a specific task, customer feedback, and other piecemeal indices—which taken separately fail to describe an organization's progress toward overall success. The author's integrated measures of success can be used to communicate organizational progress to stakeholders, shareholders, boards of trustees, corporate leaders, the workforce, and the customer base and thereby galvanize broad commitment to organizational success. Klubeck shows how his principles and methods of measuring overall success can be applied at all levels: individual, team, group, department, division, and organization. What You Will Learn: Understand why you should measure success instead of performance Understand what to measure and what not to measure Integrate the measures of success to tell a complete story Share measures of success with different audiences Who This Book Is For Organizational leaders

at all levels from the executive suite to middle management, analysts and consultants who are tasked with designing metrics programs for organizations, individuals interested in adapting the author's framework to measure overall personal success in multiple dimensions

World Transformation Jawara D. King D. D. 2006-10-24 Human unconsciousness, which is identification with thought activity, human emotions, and the thinking mind, is the only source of ALL the evil on planet Earth. All evil is the result of humanity living in darkness, not knowing who they are in their essence, beyond their earthly names and physical forms, which cause them to identify with the world of materiality. The only solution to the darkness of humanity is the light of consciousness, which is disidentification from egoic mind structures, going with the flow of life instead of fighting against it, acceptance of what is, and surrendered action. As we continue to transform individually, the entire world is transformed, because in essence, we are all ONE. Each ONE affects the whole, causing World Transformation through the concept of ONENESS by way of the ONE spiritual energetic force that moves through ALL beings. All organized religions were created by men to condition the masses to think in a certain way, or to point beyond religious belief structures to the Infinite, the formless consciousness we call God. Accepting organized religion as the absolute truth instead of relative truth is the foundation for division and the destruction of the planet. Without the transformation of human consciousness, humans will destroy themselves, each other, and the planet, and are already doing so. If humanity continues to blindly believe the media, organized religion, and all the conditioning tools of the powerful ruling Elite who run the world, without doing their own research, they will be destroyed through lack of knowledge. World Transformation: A Guide To Personal Growth And Consciousness is a transformative book that discusses over 110 life-changing topics to help spiritual seekers in their journeys in consciousness. Learn to be the awareness that is aware of and doesn't become all that you observe. World Transformation begins one person at a time. As you change, the whole world changes, because you are a part of the ONE Consciousness. Gandhi said, "be the change you want to see in the world." As you follow his advice, you become a positive force in the world. "One of the most important books of this generation!" "One of the most profound spiritual books ever written!!" Humanity will destroy themselves if they continue to blindly believe and follow the media, politicians, and organized religion, which are all used by the ruling Elite to control the masses. Most humans don't know what's going on because they allow entertainment, the media, and other brainwashing tools to control their thinking. Mark Twain said, "in religion and politics, people's beliefs and convictions are in almost every case gotten at second-hand, and without examination, from authorities who have not themselves examined the questions at issue, but have taken them at second-hand from other non-examiners, whose opinions about them were not worth a brass farthing." Social, religious, and other forms of conditioning control the minds of humanity and will destroy them if they continue to accept ideals without analyzation. It is a fact that none of the major religious figures of organized religion actually existed. Their historicity is an unverifiable opinion. Daniel Patrick Moynihan said, "everyone is entitled to their own opinion, but not their own facts." The existence of all the Saviour Gods are questionable. Humanity only believes in them because of religious conditioning. Humanity as a whole has lost their identity in the world of materiality, also known as the world of form, or the world of things. To identify with something means to mistake a person, place, or thing for who you are, the I AM before I AM a (teacher, lawyer, doctor, student, etc.) Humans have confused millions of forms for their identity. Your invisible indestructible eternal divine essence is consciousness. Common false identities humans mistake for who they are in essence are their jobs, cars, degrees, attractive spouse, belief systems, relationships, knowledge, physical appearance, education, clothes, jewelry, family history, brand names, social status, special ability, thoughts, residence, awards and achievements, race, religious or political affiliations, sports, music, and MILLIONS of other things in the external world. "Hello World! I am Jawara D. King, the writer of writers and the light at the end of the tunnel. There is NOT ONE human being alive that will not benefit from reading my book. Thankyou." How to Be Successful in College: a New Perspective on How to Be a Straight-A Student Tegegne Shiferaw 2019-08-23 We are living in a time when the media and the "know-it-all" media entrepreneurship scammers advise us not to go to college. Luck, some innate talent, and mere coincidence brought these people to fame and success, and now, they firmly believe and try to convince us that they are a genius of some sort. They never attribute their success to going to college. Not even a bit. Yet when you look closer, they are sending their kids to the best schools they know of, and unless they are lying themselves, they too are probably graduates of the most competitive colleges around. Isn't it hypocritical they want you not to go to college, but they or their children go to the best colleges? There must be an underlying reason there. Don't you think? I do. These people are not creators. They are not producers. They are marketers. They are in the business of marketing. All they want you to do is to trust them, to blindly follow them. They want you to read or listen to their garbage. Be it a book, a video, or an audio. Once they make their sales, they go for another round of benefits. This time they resort to shaping individuals who fail or unable or lack the will to go to college as a day labourer for their striving businesses. "Who needs college!" "Who needs formal education!" They will say it over and over again. They reiterate their belief in every conceivable shape and form. They will reach out to you in every possible media of communication until you trust them. Because they need hands and legs for their startups! They need disciples. They need people who hate college, who hate formal education, who hate the years that you have to spend in a lab or front of a blackboard to be a better and more productive person. Would you still be their hands and legs when you can be a brain of your own? Would you still be their blind disciple when you can be a master of your own? College gives you freedom, knowledge, hope, courage, and ultimate power. Please don't let them convince you otherwise. Don't listen to individuals who tarnish college and formal education. It is the most peaceful place to be. It is the place where you can see people change in a matter of minutes. When you get out from every single class, you come out as a far better person. Imagine being a medical doctor. As a freshman, you might know nothing. But as the years progress, you will reach to a point where you will be confident about saving lives. It is this real change that they tell you not to pursue. How can we give up on a dream that had shaped, is shaping, and will shape our journey as a human species? Yes, we shouldn't take our eyes off colleges. The principles of the good old days are still practical and true. The motivational and inspirational world of anti-college celebrities

keeps your hopes up for nothing. It might take time to feel the consequences, but the day will come that you wish you were in college. And by then, all the beautiful images they draw on your mind will be shattered. Dear reader, unless you are born with a gold spoon, don't make going to college a plan B. It shouldn't even be planned. Plan is for those things you might forget. You never plan breathing. It is automatic. That makes it very crucial to you. College should be automatic. Improvement starts at college. Your life begins there. You can start it somewhere but you will end up coming back willingly or unwillingly. Yes, college is not a plan and if it is a plan, it shall not be a plan B. Whoever is telling you not college just comes back from college or he just dropped his kids to school. Don't judge how important college is based on a view of a person who doesn't need it anymore for he he has milked what he wanted in the proper time. Don't make college a Plan B. College is not optional. It is mandatory...

The End Of Stress Andrew J. Bernstein 2013-09-05 Where does stress come from? For more than half a century, we've been told it comes from 'adverse external influences', that it's a by-product of our ancestors' fight-or-flight response, and that because life on earth has changed radically, stress is inevitable today. All of this, according to Andrew Bernstein, is wrong. In *The End of Stress*, he shows you exactly why it's wrong. He takes readers back to the 1930s, pointing out a fundamental error in how the stress concept was initially formulated, and how this mistaken formula has resulted in people relying on inefficient tools such as relaxation and positive thinking. Bernstein then reveals the truth about where stress comes from and introduces a 7-step process that transforms common challenges - including relationships, money, success, weight loss, heartbreak, uncertainty, interpersonal conflict and the loss of a loved one. *The End of Stress* offers a complete re-education in the nature of negative emotions, training readers in how to transform any issue - at home, at school, at work - in order to live happier, healthier lives.
