On the Nose Hans Florine 2016-09-01 Hans Florine embodies the genius of "and"—collaborative and competitive, fast and safe, audacious and disciplined, visionary and quantitative. The themes that run through Florine's 101 ascents of Yosemite's most iconic route can benefit people who will never climb a rock, indeed anyone inspired by the idea of a passionate, lifelong quest of any type. —Jim Collins, author of *Good to Great* Hans Florine is a big-wall climbing legend in his own time. He holds the speed record on the Nose route of El Capitan, a 3,000-foot granite cliff in Yosemite Valley that's considered the Everest of the rock-climbing world. Ascending the Nose takes most climbers anywhere from 12 to 96 hours. Florine, along with climbing partner Alex Honnold, does it in an astounding 2.5 hours. But Florine's story is not one of super-human athletic prowess; it's one of persistence and dogged determination. In 30 years of climbing, he's ascended the Nose a mind-blowing, death-defying 100 times, more than anyone else ever has, and most likely ever will. In *On the Nose*, Florine

describes the most dangerous, pivotal, and inspirational of those climbs, providing a rare look inside the adrenaline-charged world of competitive climbing in Yosemite Valley. He tells of his very first attempt on the Nose, which ended in failure after 14 hours, his friendships (and rivalries) with climbing's most colorful personalities, and his battle with Dean Potter to secure the definitive speed record on the Nose—an endeavor that's been called the wildest competition known to man. Perhaps most interestingly, Florine attempts to answer the question why. Why would anyone undertake one of the greatest adventure epics on earth 100 times? His answers provide unique insights on how to live a satisfying life, how to achieve big goals, and how an otherwise ordinary guy can become a rock star.

Social Work in Europe Charlotte Williams

2013-09-13 It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race

equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

Schools Cannot Do it Alone Jamie Robert Vollmer
2010 Schools Cannot Do It Alone tells of Jamie Vollmer, businessman and attorney, as he travels

through through the land of public education. His encounters with blueberries, bell curves, and smelly eighth graders lead him to two critical discoveries. First, we have a systems problem, not a people problem. We must change the system to get the graduates we need. Second, we cannot touch the system without touching the culture of the surrounding town; everything that goes on inside a school is tied to local attitudes, values, traditions, and beliefs. Drawing on his work in hundreds of districts, Jamie offers teachers, administrators, board members, and their allies a practical program to secure the understanding, trust, permission, and support they need to change the system and increase student success.

Jack McAfghan Kate McGahan 2015-04-02 An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to love, or grieving over the loss of a friend. Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives. This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

Global Tribe Graham St. John 2012 Trance events

have an uncanny ability to capture an era, and captivate an audience of travellers occupying the eternal theatre of the dance floor. As this book shows, the tendency within psytrance is to thwart the passage of time, to prolong the night, for those who adopt a liminal lifestyle. Amid the hustle and hubris of the psytrance carnival there is a peaceful repose that you sometimes catch when you've drifted into a sea of outstretched limbs, bodies swaying like a field of sunflowers in a light breeze. And you feel intense joy in this fleeting moment. You are the moment. You are inside the flow. You are all. Embodying the poetry of dance, you are living evidence that nothing lasts. And this is a deep revelation of the mystical function of trance. It is difficult to emerge from this little death, because one does not want the party to end. But it must end, even so that it can recommence--so that one can return to repeat the cycle. The result of fifteen years of research in over a dozen countries, this book applies a sharp lens on a little understood global dance culture that has mushroomed all over the world since its beginnings in the diverse psychedelic music scenes flourishing in Goa in the 1970s and 1980s. The paramount expression of this movement has been the festival, from small parties to major international events such as Portugal's Boom Festival, which promotes itself as a world-summit of visionary arts and trance, a "united tribe of the world." Via first-hand accounts of the scenes, events and music of psychedelic trance in Australia, Israel, Germany, Italy, the UK, the US, Turkey and other places, the book thoroughly documents this transnational movement with its diverse aesthetic roots, multiple national translations and internal controversies. As a multi-sited ethnography and an examination of the digital, chemical, cyber and media assemblage constituting psytrance, the book explores the integrated role that technology and spirituality have played in the formation of this visionary arts movement and shows how these event-cultures accommodate rites of risk and consciousness, a complex circumstance demanding

revision of existing approaches to ritual, music and culture.

Implementing CIFS Christopher R. Hertel 2004
"The book that Microsoft should have written, but didn't." --Jeremy Allison, Samba Team "Your detailed explanations are clear and backed-up with source code--and the numerous bits of humor make a dry subject very enjoyable to read." --J.D.

Lindemann, network engineer, Adaptec, Inc. The first developer's guide to Microsoft(R)'s Internet/Intranet file sharing standard For years, developers and administrators have struggled to understand CIFS, Microsoft's poorly documented standard for Internet file sharing. Finally, there is an authoritative, cross-platform guide to CIFS capabilities and behavior. Implementing CIFS not only delivers the priceless knowledge of a Samba Team member dedicated to investigating the inner workings of CIFS, it also identifies and describes crucial specifications and supporting documents. Provides essential information for designing and debugging large Windows(R) and/or Samba networks Offers clear, in-depth introductions to Server Message Block (SMB), NetBIOS over TCP/IP (NBT), browser services, and authentication Drills down into the internals of CIFS, exposing its behavior on the wire and at the desktop--and its strange quirks Presents illustrative code examples throughout Reflects years of work reviewing obscure documentation, packet traces, and sourcecode Includes the SNIA CIFS Technical Reference Implementing CIFS will be indispensable to every developer who wants to provide CIFS compatibility--and every administrator or security specialist who needs an in-depth understanding of how it really works.
