The Changing Image of the Sciences Ida H. Stamhuis 2012-09-26 This volume is written as a reaction to the worldwide decreasing interest in the natural sciences. It addresses many intriguing questions. How is the changing image of the distinct sciences experienced by the general public, by the scientists themselves, or in disciplines in which natural sciences are applied? How can it be connected to the phenomenon of the low number of women in science? It is of interest to researchers, teachers, and students of natural sciences, the history of science, and philosophy.

The Heart of Change Field Guide Dan S. Cohen 2005-11-09 In 1996, John P. Kotter's Leading Change became a runaway best seller, outlining an eight-step program for organizational change that was embraced by executives around the world. Then, Kotter and co-author Dan Cohen's The Heart of Change introduced the revolutionary "see-feel-change" approach, which helped executives understand the crucial role of emotion in successful change efforts. Now, The Heart of Change Field Guide provides leaders and managers tools, frameworks, and advice for bringing these breakthrough change methods to life within their own organizations. Written by Dan Cohen and with a foreword by John P. Kotter, the guide provides a practical framework for implementing each step in the change process, as well as a new three-phase approach to execution: creating a climate for change, engaging and enabling the whole organization, and implementing and sustaining change. Hands-on diagnostics—including a crucial "change readiness module"—reveal the dynamics that will help or hinder success at each phase of the change process. Both flexible and scaleable, the frameworks presented in this guide can be tailored for any size or type of change initiative. Filled with practical tools, checklists, and expert commentary, this must-have guide translates the most powerful approaches available for creating successful change into concrete, actionable steps for you and your organization. Dan Cohen is the co-author, with John P. Kotter, of The Heart of Change, and a principal with Deloitte Consulting, LLC.

Uneasy Careers and Intimate Lives Pnina G. Abir-Am 1987 These pioneering studies of women in science pay special attention to the mutual impact of family life and scientific career. The contributors address five key themes: historical changes in such concepts as scientific career, profession, patronage, and family; differences in "gender image" associated with various branches of science; consequences of national differences and emigration; opportunities for scientific work opened or closed by marriage; and levels of women's awareness about the role of gender in science.

Telling Lives in Science Senior Lecturer in the History and Philosophy of Science Michael Shortland 1996-06-27 Collects together original essays by leading historians of science on the nature and development of scientific biography.

Collision of Destinies Steven L. Benson 2011-11-17 Steve Benson is a pugnacious, outgoing, and athletic twenty-six-year-old. After losing his first professional teaching assignment in Minneapolis, Minnesota, he puts his career on hold and hits the road in a rebuilt Volkswagen. The trip takes him to Ft. Lauderdale, Florida, where he discovers an ad asking for men with mechanical ability to work on ship. He wins the job and moves on board the 185 foot vessel on a promise he be chosen to accompany the newly remodeled vessel to South America. In this travelogue, the Miami-based renovation process is fraught with conflict and deception during which Steve and ten other crewmen survive the hostile work environment long enough to board passengers bound for the Galapagos Islands; where iguanas spit, whales calve, and seals dance in one of the worlds most unique wildlife sanctuaries. It is during this incredible journey that captain Mike of the M/V Buccaneer becomes Stevens father figure, the crew his surrogate family, and Steve moves a giant step closer to becoming a man.

Granite Island Dorothy Carrington 2015-04-30 'Get away from here before you're completely bewitched and enslaved...' Dorothy Carrington was told, while sitting in a fisherman's cafe at the magically quiet midday hour. But enslaved she was. GRANITE ISLAND, much more than a travel book, grew out of years spent in Corsica and is an incomparably vivid and delightful portrait. For the first time Corsica is brought to light as a vital element in Europe: a highly individualistic island culture whose people have nurtured their love of freedom and political justice, as well as their pride, hospitality and poetry.

Just when Joey's life seemed to be getting better, one night sends her memory into overdrive. Not able to cope, she pushes away the only friend she could count and tries to cut out all the rest. When a new student walks into her class and is assigned the seat next to hers, Joey's not sure whether punch him or kick him below the belt with how forward he is. All this while fighting the urge to go back and beg Zephyr to be hers again. When the unthinkable happens, she has a hard decision to make--the hardest she's ever had to make: to stay or go.

Her Tender Tyrant Elizabeth Lennox 2014-12-19 Marcus moved through life expecting everything to be logical. Science could explain everything and he'd learned to make enormous profits understanding science. So when he runs into the illogical Juliette, his mind has a hard time understanding why she would walk down the street singing and dancing. There wasn't any music! But no matter how much he craved logic and reason, his body craved Juliette more. Juliette is fascinated by Marcus's stoicism. How could he walk down the street and not feel the joy in the sunshine? How could he ignore the sounds of the grasshoppers and birds? Or smile at the perfection of a flower? And how could her mind and body need a man who didn't understand the joy of living life for the moment? Enjoy the fifth book in The Alfieri Saga!

Felix Holt; Jubal, and Other Poems; And the Spanish Gypsy (Classic Reprint) George Eliot 2018-01-31 Excerpt from Felix HoGrown leaves to make a resting-place for the jewels of the boar-frost. Such hedgerows were often as tall as the laborers' cottages dotted along the lanes, or clustered into a small hamlet, their little dingy windows telling, like thick-filmed eyes, of nothing but the darkness within. The passenger on the coach-box, bowled along above such a hamlet, saw chiefly the roofs of it: probably turned its back on the road, and seemed to lie away from everything but its own patch of earth and sky, away from the parish church by long fields and green lanes, away from all inter course except that of tramps. If its face could be seen, it was most likely dirty; but the dirt was Protestant dirt, and the big, bold, gin-breathing tramps were Protestant tramps. There was no sign of superstition near, no crucifix or image to indicate a misguided reverence: the inhabitants were probably so free from superstition that they were in much less awe of the parson than of the overseer. Yet they were saved from the excesses of Protestantism by not knowing how to read, and by the absence of handlooms and mines to be the pioneers of Dissent: they were kept safely in the via media of indifference, and could have registered themselves in the census by a big black mark as members of the Church of England. But there were trim cheerful Villages too, with a neat or handsome parsonage and gray church set in the midst; there was the pleasant tinkle of the blacksmith's anvil, the patient cart horses waiting at his door; the basket-maker peeling his willow wands in the sunshine; the wheelwright putting the last touch to a blue cart with red wheels; here and there a cottage with bright transparent windows show ing pots full of blooming balsams or geraniums, and little gardens in front all double daisies or dark wallflowers; at the well, clean and comely women carrying yoked buckets. And toward the free school small Britons dawdling 011, and handling their marbles in the pockets of unpatched cor duroys adorned with brass buttons. The land around was rich and marly, great corn-stacks stood in the rick-yards for the rick-burners had not found their way hither; the homesteads were those of rich farmers who paid no rent. Or had the rare advantage of a lease, and could afford to keep their corn till prices had risen. The coach would be sure to overtake some of them on their way to their outly ing fields or to the market-town, sitting heavily on their well-groomed horses, or weighing down one side of a1: olive-green gig. They probably thought of the coach witl' About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The Sermon on the Fall of Rome Jérôme Ferrari 2014-09-04 The mysterious disappearance of Hayet, the manageress of the village bar, presents a conundrum for its owner, who cannot face a return to the days of late nights, lewd customers and greasy dishwater. A succession of would-be hosts and hostesses descend, with disastrous results, before Matthieu and Libero, childhood friends disillusioned with their philosophical studies, return to take up the reins. Initially they are successful, but as lustful, avaricious reality rudely intrudes on their idyll, they too are forced to concede, their senses befuddled by easy women and plentiful liquor, that all empires must inevitably crumble. Meanwhile, Matthieu's grandfather Marcel, who funded their enterprise, perhaps out of spite, still lingers on the island, his memories of the collapse of France's colonial empire still as fresh and bitter as the cancerous ulcers that must one day claim his life. By turns wise, comic, dramatic, tragic and absurd, Ferrari's Goncourt-winning masterpiece reads like a Corsican One Hundred Years of Solitude, covering a century of intimate history with a dazzling, skewering precision even Flaubert would be proud to applaud.

The Disciple Paul Bourget 1946

Balco Atlantico Jérôme Ferrari 2019-03-21 In a village square in Corsica lies the body of ardent nationalist, Stéphane Campana, shot down at close range. And over his body weeps Virginie, the young woman who has venerated Stéphane all her life - a veneration that has led her to abandon herself to him and his twisted desires completely. Meanwhile, brother and sister Khaled and Hayet, who once gazed out to sea from the shoreline path known as "Balco Atlantico" and dreamed of a better future, are now stranded in Corsica. As Ferrari traces the history of Stéphane and Virginie that leads to the shooting in the village square, we encounter the story of Khaled and Hayet and see through their story and the stories of many others in this one Corsican square how a relentless pursuit of happiness and fulfilment can bring us perilously close to despair and disillusionment.

Rereading George Eliot Bernard J. Paris 2003 A noted Eliot scholar explores how we become different interpreters of literature as we undergo psychological change. In a probing analysis that has broad implications for theories of reading, Bernard J. Paris explores how changes in his needs and changes in his own psychology have affected his responses to George Eliot over the years. Having lost his earlier enthusiasm for her "Religion of Humanity," he now appreciates the psychological intuitions that are embodied in her brilliant portraits of characters and relationships. Concentrating on Eliot's most impressive psychological novels, Middlemarch and Daniel Deronda, Paris focuses on her detailed portrayals of major characters in an effort to recover her intuitions and appreciate her mimetic achievement. He argues that although she intended for her characters to provide confirmation of her views, she was instead led to deeper, more enduring truths, although she did not consciously comprehend the discoveries she had made. Like her characters, Paris argues, these truths must be disengaged from her rhetoric in order to be perceived.

PCB Design for Real-World EMI Control Bruce R. Archambeault 2013-06-29 Proper design of printed circuit boards can make the difference between a product passing emissions requirements during the first cycle or not. Traditional EMC design practices have been simply rule-based, that is, a list of rules-of-thumb are presented to the board designers to implement. When a particular rule-of-thumb is difficult to implement, it is often ignored. After the product is built, it will often fail emission requirements and various time consuming and costly add-ons are then required. Proper EMC design does not require advanced degrees from universities, nor does it require strenuous mathematics. It does require a basic understanding of the underlying principles of the potential causes of EMC emissions. With this basic understanding, circuit board designers can make trade-off decisions during the design phase to ensure optimum EMC design. Consideration of these potential sources will allow the design to pass the emissions requirements the first time in the test laboratory. A number of other books have been published on EMC. Most are general books on EMC and do not focus on printed circuit board is intended to help EMC engineers and design design. This book engineers understand the potential sources of emissions and how to reduce, control, or eliminate these sources. This book is intended to be a 'hands-on' book, that is, designers should be able to apply the concepts in this book directly to their designs in the real-world.

For Better or For Worse? Collaborative Couples in the Sciences Annette Lykknes 2012-06-05 In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies *The Nazarene: A Romance* contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.
