The book has been adapted into a television series, a Broadway play, a Hollywood feature film, and an Indian feature film.

*The Night Climbers* Ivo Stourton 2008-10-14  
James, a first-year student at Cambridge, is overwhelmed by the thrill of opportunity and startled by his own hunger for friendship. He finds himself seduced by a covert and exclusive circle of friends - the 'Tudor Night Climbers' - who scale the university's turrets after dark, transforming it into a dangerous playground of spiralling heights. When still only a novice member of his tribe, James begins to fall for the only female in the group, the enigmatic and beautiful Jessica, and is soon at the heart of a fatal love triangle with the reckless and charismatic leader of the group, Francis. When a volatile relationship finally explodes, the Night Climbers' funding suddenly dries up, until Francis dreams up a heist that will secure them millions, but will also test their very souls. Partly inspired

by the original 'Night Climbers' of the Sixties who famously made dare-devil leaps from college roofs, this passionate exploration of youth at its most vital and unstable marks the debut of a strikingly gifted new writer.

**What Stress Can Do** Harry L. Campbell 2014-04  
Whether it's your daily dealings at work or a pervasive concern for your physical safety, the stress you regularly experience may actually be more harmful than the threat that triggered it. Not only can it lead to isolation and an erosion of happiness, stress can be biologically harmful, bringing about health issues, such as heart disease, high blood pressure, ulcers, and strokes. In short, successfully managing stress could be nothing less than a life-or-death situation. Now, professional biofeedback practitioner Harry L. Campbell presents "What Stress Can Do," his unprecedented guide to the importance of minimizing everyday stress in order to short-circuit its many serious side effects. What's more, his easy-to-implement recommendations enable you to do so without use of any drugs. Recent data on the prevalence of stress documents that as much as 90 percent of all doctors' office visits are related to stress. However, with the right skills and perspective, you can preempt the physical fallout from the tolls of daily life, and gain new mastery over your mind. The time is right to take a step back, breathe easy, and once and for all address all that ails you.

**The Idea Factory** Jon Gertner 2012-03-15  
The definitive history of America's greatest incubator

of innovation and the birthplace of some of the 20th century's most influential technologies "Filled with colorful characters and inspiring lessons . . . The Idea Factory explores one of the most critical issues of our time: What causes innovation?" —Walter Isaacson, The New York Times Book Review "Compelling . . . Gertner's book offers fascinating evidence for those seeking to understand how a society should best invest its research resources." —The Wall Street Journal From its beginnings in the 1920s until its demise in the 1980s, Bell Labs-officially, the research and development wing of AT&T-was the biggest, and arguably the best, laboratory for new ideas in the world. From the transistor to the laser, from digital communications to cellular telephony, it's hard to find an aspect of modern life that hasn't been touched by Bell Labs. In The Idea Factory, Jon Gertner traces the origins of some of the twentieth century's most important inventions and delivers a riveting and heretofore untold chapter of American history. At its heart this is a story about the life and work of a small group of brilliant and eccentric men-Mervin Kelly, Bill Shockley, Claude Shannon, John Pierce, and Bill Baker-who spent their careers at Bell Labs. Today, when the drive to invent has become a mantra, Bell Labs offers us a way to enrich our understanding of the challenges and solutions to technological innovation. Here, after all, was where the foundational ideas on the management of innovation were born.

Data Science and Simulation in Transportation Research Janssens, Davy 2013-12-31 Given its effective techniques and theories from various sources and fields, data science is playing a vital role in transportation research and the consequences of the inevitable switch to electronic vehicles. This fundamental insight provides a step towards the solution of this important challenge. Data Science and Simulation in Transportation Research highlights entirely new and detailed spatial-temporal micro-simulation methodologies for human mobility and the emerging dynamics of our society. Bringing together novel ideas grounded in big data from various data mining and transportation science sources, this book is an essential tool for professionals, students, and researchers in the fields of transportation research and data mining.

**Green to Gold** Daniel C. Esty 2009-01-09 From the Publishers Weekly review: "Two experts from Yale tackle the business wake-up-call du jour-environmental responsibility-from every angle in this thorough, earnest guidebook: pragmatically, passionately, financially and historically. Though "no company the authors know of is on a truly long-term sustainable course," Esty and Winston label the forward-thinking, green-friendly (or at least green-acquainted) companies WaveMakers and set out to assess honestly their path toward environmental responsibility, and its impact on a company's bottom line, customers, suppliers and reputation. Following the evolution of business attitudes toward environmental concerns, Esty and Winston offer a series of fascinating plays by corporations such as Wal-Mart, GE and Chiquita (Banana), the bad guys who made good, and the good guys-watchdogs and industry associations, mostly-working behind the scenes. A vast number of topics huddle beneath the umbrella of threats to the earth, and many get a thorough analysis here: from global warming to electronic waste "take-back" legislation to subsidizing sustainable seafood. For the responsible business leader, this volume provides plenty of (organic) food for thought. "

Higher Education: Handbook of Theory and Research Michael B. Paulsen 2015-01-12

Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains chapters on such diverse topics as research on college students and faculty, organization and administration, curriculum and instruction, policy, diversity issues, economics and finance, history and philosophy, community colleges, advances in research methodology and more. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

Mormon Enigma Linda King Newell 1994 Mormon Enigma is the bestselling biography of Emma Hale Smith, wife of the Mormon prophet Joseph Smith. It was Joseph Smith who announced that an angel of the Lord had commanded him to introduce a 'new order of marriage.' And it was

Emma Hale Smith who confronted the practice of polygamy head on. As the authors note in their introduction, "Early .....

Explaining Electricity Jim (James William) Ross 2004 Electricity can be easy to understand! A fruitful model of simple electric circuits is developed and applied in these pages. The approach is highly pictorial: electric potential (Volts) and electric current (Amps) are represented by simple diagrams. The student is expected to use these diagrams as the principal mode of analyzing circuits. When algebra and equations are introduced, the student already has an understanding of V, I, R and P from the diagrams. As in all of the Ross Lattner IntuitivScience series, diagrams are an important mode of expression. Parents and teachers, you get one half of the book! We provide solid pedagogical supports, recipes, and methods of presentation. The unit itself is further subdivided into four sections, approximating four weeks of 70-minute classes. 1. Static electricity and the electrical structure of matter 2. Characteristics of electric current, and development of a model of current, potential, resistance and power 3. Mathematical treatment of series and parallel circuits 4. Projects that are either an application of the model or an extensions of the model. At the end of sections 1 - 3 is a thorough quiz, in the same pictorial style. Because this unit involves fundamental forces and concepts, we recommend that it be placed first in the series of the four Ross Lattner Grade Nine Academic IntuitivScience books. In particular, this book should be placed before chemistry.

*Energy at the End of the World* Laura Watts 2019-01-15 Making local energy futures, from marine energy to hydrogen fuel, at the edge of the world. The islands of Orkney, off the northern coast of Scotland, are closer to the Arctic Circle than to London. Surrounded by fierce seas and shrouded by clouds and mist, the islands seem to mark the edge of the known world. And yet they are a center for energy technology innovation, from marine energy to hydrogen fuel networks, attracting the interest of venture capitalists and local communities. In this book, Laura Watts tells a story of making energy futures at the edge of the world. Orkney, Watts tells us, has been making technology for six thousand years, from arrowheads and stone circles to wave and tide

energy prototypes. Artifacts and traces of all the ages—Stone, Bronze, Iron, Viking, Silicon—are visible everywhere. The islanders turned to energy innovation when forced to contend with an energy infrastructure they had outgrown. Today, Orkney is home to the European Marine Energy Centre, established in 2003. There are about forty open-sea marine energy test facilities in the world, many of which draw on Orkney expertise. The islands generate more renewable energy than they use, are growing hydrogen fuel and electric car networks, and have hundreds of locally owned micro wind turbines and a decade-old smart grid. Mixing storytelling and ethnography, empiricism and lyricism, Watts tells an Orkney energy saga—an account of how the islands are creating their own low-carbon future in the face of the seemingly impossible. The Orkney Islands, Watts shows, are playing a long game, making energy futures for another six thousand years.

*Contemporary Philosophical Proposals for the University* Aaron Stoller 2018-02-12 This edited collection brings together a robust range of philosophers who offer theoretically and critically informed proposals regarding the aims, policies, and structures of the university. The collection fills a major gap in the landscape of higher education theory and practice while concurrently reviving a long and often forgotten discourse within the discipline of philosophy. It includes philosophers from across the globe representing disparate philosophical schools, as well as various career stages, statuses, and standpoints within the university. There is also a diversity in method, approach and style, which varies from personal narratives and case studies, to philosophical genealogies, to traditional philosophical essays, and to systematic theories. The collection can serve as a theoretical resource for critically minded administrators and faculty who wish to analyze and change policies and structures at their home institutions. It will introduce them to a wide range of possible educational imaginaries, as well as provide them with productive suggestions for pragmatic change on campuses.

Hell's Angels Hunter S. Thompson 2012-08-01  
Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction.

"California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as *The New Yorker* pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in 1967, *Hell's Angels* is a gripping portrait, and the best account we have of the truth behind an American legend.

**Conscience and Community** Robert Alan Goldberg 2018 "Lowell Bennion, Sterling McMurrin, and Obert Tanner were friends and colleagues whose lives often intertwined. Professors at the University of Utah, these three scholars collaborated in addressing issues and events of their time; each influenced the thought and culture of Mormonism, helping to institute a new period of intellectual life and social activism. In *Conscience and Community* multiple scholars, family members, and others look at the private and public aspects of three lives and examine the roles they played in shaping their communities inside and out of their university and church.

Lowell Bennion was founding director of the LDS Institute of Religion and professor of sociology at the University of Utah. He established multiple community service entities. Sterling McMurrin was a distinguished professor of philosophy and history, a graduate school dean, and former commissioner of education under JFK. He dismissed dogma and doctrine as barriers to a search for moral and spiritual understanding. Obert Tanner, also of the university's Philosophy Department, excelled in teaching and in business and became especially well known for philanthropy. The lives and work of these three men reveal the tensions between faith and reason, conscience and obedience. Their stories speak to us today because their concerns remain our concerns: racial justice, women's equality, gay rights, and the meaning of integrity and conscience"--Provided by publisher.

Those Who Leave and Those Who Stay Elena Ferrante 2014-09-02 Part of the bestselling saga about childhood friends following different paths by "one of the great novelists of our time" (*The New York Times*). In the third book in the *New York Times*-bestselling Neapolitan quartet that inspired the HBO series *My Brilliant Friend*, Elena and Lila have grown into womanhood. Lila married at sixteen and has a young son; she has left her husband and the comforts her marriage brought and now works as a common laborer. Elena has left the neighborhood, earned her college degree, and published a successful novel, all of which has opened the doors to a world of learned interlocutors and richly furnished salons. Both women are pushing against the walls of a prison that would have seen them living a life of misery, ignorance, and submission. They are afloat on the great sea of opportunities that opened up for women during the 1970s. And yet, they are still very much bound to each other in a book that "shows off Ferrante's strong storytelling ability and will leave readers eager for the final volume of the series" (*Library Journal*). "One of modern fiction's richest portraits of a friendship." —NPR

Azalea Springs Jeff Tolley 2012-07-01 "The small town of Azalea Springs that has lived in seemingly charmed ignorance for generations finds itself floundering in a modern era of hate and revenge. Gary Tatum battles intolerance, racism, and ethnic superiority while Azalea Springs' least favorite son, Rusty Wicker, battles to keep the power that he has won through murder, intimidation, and the local drug trade. Russell Vaughn is the big-time, small town lawyer who secretly struggles with his desire for revenge. Michael and Grace Fleming are the newcomers who are thrust into a conspiracy that pits Old South ideals against the progress of the New South"--Page 4 of cover.

In Chancery John Galsworthy 1920  
The Academic Entrepreneur John Paul Tabakian 2013-04-17 Public funding for community colleges has been steadily declining since the peak of funding in the 1970s. Surviving the constant threats of budgetary cuts has been a key motivating factor for community colleges to embrace academic entrepreneurialism. I examined the academic entrepreneurial pursuits of one California Community College (CCC) to understand those factors that encourage community college faculty to pursue academic entrepreneurial solutions. The purpose of this qualitative study is to examine factors that encourage academic entrepreneurialism among community college faculty. Specifically, I investigated three categories of factors that influence academic entrepreneurialism:

individual, institutional, and environmental. Individual factors include demographic and background characteristics, including age, race, gender, academic training, and previous professional careers. Institutional factors include program offerings available for students, institutional reputation and history, institutional policies and practices, and academic and administrative leadership. Environmental factors relate to the peer influences of a campus that encourages academic entrepreneurial behavior of faculty. The significance of this study lies in the identification of factors that encourage academic entrepreneurialism among community college faculty, ultimately supporting institutional efforts to augment funding. I investigated individual, institutional, and environmental factors that encourage academic entrepreneurialism among community college faculty. Accordingly, the research questions identify key factors that encourage academic entrepreneurialism among community college faculty and explain how they facilitate faculty to engage in academic entrepreneurialism. The research questions that I evaluated in this study are: What individual, institutional, and environmental factors influence community college faculty to engage in academic entrepreneurialism? What is the relationship between faculty background, institutional, and environmental characteristics and the frequency and quality of academic entrepreneurialism among community college faculty? I found that all three factors are essential elements of academic entrepreneurialism among community college faculty. Individual, institutional, and environmental factors consist of people who are all pursuing their self-interest. This follows the tenets of rational choice theory as the study finds that self-interest influences faculty academic entrepreneurialism. The study argues that changes to institutional policies are the key determining factor to encourage academic entrepreneurialism among community college faculty. Institutional policies determine how a college functions and understands the interrelationship between individual, institutional, and environmental factors. Encouraging academic entrepreneurialism among community college faculty requires institutional policies that focus on the fundamental issue: recruiting,

retaining, and evaluating community college faculty. The study offers suggestions for how to influence institutional policies that in turn encourage faculty academic entrepreneurialism by addressing the following areas: faculty job descriptions, faculty job announcements, evaluating faculty levels of academic entrepreneurialism, and offering entrepreneurial faculty financial incentives.

2021-11-15 **\*\*NOT A STANDALONE SERIES!**  
HIGHLY recommend to read Darkness & Collector Series prior. Lightness Saga contains story-lines, world-building, and spoilers from previous books

and characters. Starting with Darkness Series> Collector Series> Lightness Saga. A war is brewing. Kennedy is one of the last known Druids. Wanted dead by the Seelie Queen and as a coveted asset to defeat this cruel ruler, Kennedy has become a mark. Especially by a sexy, merciless Dark Dweller, Lorcan Dragen. Kidnapped and taken prisoner, Kennedy's life takes a dramatic turn, down a path she never imagined. Spending time with a man who killed her best friend's mother and her friend, she knows he is not someone she should care about. But the longer she spends with her enemy, the more her feelings blur the line between what is right and wrong, what is true and what is not. As her magic grows, so does the shy, nerdy girl, and she soon realizes nothing on a list or in a book will prepare her for what is ahead. Even her own feelings.

Desert Journal Ruth Weiss 2012-04-03 Poetry. Drawings by Paul Blake. Originally published in 1977 by Good Gay Poets of Boston. "A book whose page has come. ruth weiss has been sounding these poems, alone or with jazz accompaniment, for many years. It's now ocheny chorosho that they appear for the senses of those potential poets searching for new modulations of expression; for her poems are of the rhythms of our time and the interlaced, repetitive subtleties are sewn by that 'thread for those who breathe in rags' (Vallejo) which bespeaks and sings the deep loom of the bronze lotus."—Jack Hirschman
