The Paradox of Power and Weakness George Kunz 1998-01-01 Offers an alternative paradigm for psychology, one that reflects Levinas's criticism of a self-centered notion of identity. Reveals the secret of an "authentic" altruism through a phenomenology of both power and weakness, and of the paradoxes of the weakness of power and the power of weakness.

The Environmental Implications of Population Dynamics

Lori M. Hunter 2000 This report discusses the relationship between population and environmental change, the forces that mediate this relationship, and how population dynamics specifically affect climate change and land-use change.

Play Among Books Miro Roman 2021-12-06 How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an "infinite flow" of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.

Student Nationalism in China, 1924-1949 Lincoln Li

1994-01-01 Li examines the critical role of the younger generation as a political force, influenced by the cultural and ideological debates during China's reunification in 1927 and again in 1949. He focuses on key organizations to illustrate how political parties turned explosive, national feelings into an organized political force. Li shows how Chinese student

nationalism, despite its radical image, represents a prominent feature of continuity in Chinese sociopolitical culture.

Environmentalism and Political Theory Robyn Eckersley

1992-01-01 This book provides the most detailed and comprehensive examination to date of the impact of environmentalism upon contemporary political thought. It sets out to disentangle the various strands of Green political thought and explain their relationship to the major Western political traditions. Environmentalism and Political Theory represents the consolidation of a new field of political inquiry that is destined to become an increasingly important component of political studies and political reporting worldwide. An interdisciplinary study that builds bridges between environmental philosophy, ecological thought, and political inquiry, this book employs a range of new insights from environmental philosophy to outline a particular Green political perspective.

Global Civil Society in International Lawmaking and Global Governance Barbara Woodward 2010-05-17 Drawing upon 'global governance,' 'global civil society' (GCS) and 'international lawmaking' scholarship and presenting studies of GCS practice in international lawmaking processes, including treaty-making, conferences, international organisations and adjudicatory mechanisms, this book comprehensively re-evaluates GCS's role in public international lawmaking.

Studies in the Zohar Yehuda Liebes 1993-01-01 This book deals with the "Book of Splendor" (Sefer ha-Zohar), the greatest achievement of Kabbalah and one of the most influential sources of Western mysticism. This book offers a new interpretation of the Zohar, analyzing both

its theoretical content and its historical context; it also brings the theory and the history together by indicating the personal and autobiographical elements in the Zohar's teachings. The author delves into the issues of the messianic elements of the Zohar, the way it was written, and its relationship to Christianity, Gnosticism, and Talmudic literature.

Inside the Green Lobby Bernard C. Melewski 2022-02-01 A veteran environmental lobbyist reveals the behind-the-scenes struggles to address threats to the future of New York's Adirondack Park. Inside the Green Lobby recounts the behind-the-scenes efforts, both at the State Capitol in Albany and the halls of Congress, of a lobbyist for a major environmental advocacy group. Bernard C. Melewski worked to save the six-million acre Adirondack Park from twin threats to its future: the devastating damage from acid rain and the sudden breakup of massive private land holdings that had been intact for almost one hundred years. Starting with the political uproar ignited by the recommendations of New York Governor Mario Cuomo's 1990 Adirondack Park Commission, and the rejection by the public of a new environmental bond act, Inside the Green Lobby documents the events that led to the sudden acquisition by New York State of tens of thousands of acres within the park that the public now enjoys. From strategy sessions with lobbyists to private meetings with legislators, governors, members of Congress, and even the President of the United States, Melewski recounts engaging and entertaining stories that introduce how environmental advocates successfully pursue legislative and policy change. Bernard Melewski is an environmental attorney, organic farmer, and farm winery owner in Altamont, New York.

Lost T'ai-chi Classics from the Late Ch'ing Dynasty

Douglas Wile 1996-01-01 Analysis of rich new material allows Wile to make a fresh survey of longstanding issues: the origins of T'ai-chi; the authorship of the classics; the differences between Wu, Yang, and Li; and the roles of such figures as Chang San-feng, Wang Tsung-yueh, Chiang Fa, and the formerly missing link, Ch'ang Nai-chou.

Ethics and Global Security Anthony Burke 2014-06-27 This book will be the first systematic examination of the role that ethics plays in international security in both theory and practice, and offers the reader a concrete ethics for global security. Questions of morality and ethics have long been central to global security, from the death camps, world wars and H-bombs of the 20th century, to the humanitarian missions, tsunamis, terrorism and refugees of the 21st. This book goes beyond the Just War tradition to demonstrate how ethical commitments influence security theory, policy and international law, across a range of pressing global challenges. The book highlights how, from patrolling a territorial border to maintaining armed forces, security practices have important ethical implications, by excluding some from consideration, presenting others as potential threats and exposing them to harm, and licensing particular actions. While many scholars and practitioners of security claim little interest in ethics, ethics clearly has an interest in them. This innovative book extends the traditional agenda of war and peace to consider the ethics of force short of war

such as sanctions, deterrence, terrorism, targeted killing, and torture, and the ethical implications of new security concerns such as identity, gender, humanitarianism, the responsibility to protect, and the global ecology. It advances a concrete ethics for an era of global threats, and makes a case for a cosmopolitan approach to the theory and practice of security that could inspire a more just, stable and inclusive global order. This book fills an important gap in the literature and will be of much interest to students of ethics, security studies and international relations.

Eating Chilli Crab in the Anthropocene Matthew

Schneider-Mayerson 2020-06-27 In this era of climate crisis, in which our very futures are at stake, sustainability is a global imperative. Yet we tend to associate sustainability, nature, and the environment with distant places, science, and policy. The truth is that everything is environmental, from transportation to taxes, work to love, cities to cuisine. This book is the first to examine contemporary Singapore from an ecocultural lens, looking at the ways that Singaporean life and culture is deeply entangled with the nonhuman lives that flourish all around us. The authors represent a new generation of cultural critics and environmental thinkers, who will inherit the future we are creating today. From chilli crab to Tiger Beer, Changi Airport to Pulau Semakau, 0-levels to orang minyak films, these essays offer fresh perspectives on familiar subjects, prompting us to recognise the incredible urgency of climate change and the need to transform our ways of thinking, acting, learning, living, and governing so as to maintain a stable planet and a decent future.

Women as Weapons of War Kelly Oliver 2007 From the female soldiers of Abu Ghraib prison to Palestinian women suicide bombers, women and their bodies have been "powerful weapons" in the Afghanistan and Iraq wars. Kelly Oliver reveals how the media and the George W. Bush administration used metaphors of weaponry to describe women and female sexuality and forge a link between vulnerability and violence. Oliver analyzes the discourse surrounding women, sex, and gender and the use of women to justify America's decision to go to war. She also considers the cultural meaning, or lack of meaning, that lead female soldiers at Abu Ghraib to abuse prisoners "just for fun," and the commitment to death made by women suicide bombers. She examines the pleasure taken in violence and the passion for death and what kind of contexts creates them. Oliver concludes with a diagnosis of our fascination with sex, violence, and death and its relationship with live news coverage and embedded reporting, which naturalizes horrific events and stymies critical reflection.

Studies in Ecstatic Kabbalah Moshe Idel 1988-01-01 This book presents important topics regarding the more mystical trend of Kabbalah--the ecstatic Kabbalah. It includes the mystical union, the world of imagination, and concentration as a spiritual technique. The emphasis in the text is on the interaction between the "original" Spanish stage of Kabbalah and Muslim mysticism in the East, mainly in the Galilee. The influence of the

Kabbalistic-Sufic synthesis on the later developments of Jewish mysticism is traced, thereby providing a more precise understanding of the history of Kabbalah as an interplay between the theosophical and ecstatic mystical experiences.

Women's Secrets Helen Rodnite Lemay 1992-10-14 Women's Secrets provides the first modern translation of the notorious treatise *De secretis mulierum*, popular throughout the late middle ages and into modern times. The Secrets deals with human reproduction and was written to instruct celibate medieval monks on the facts of life and some of the ways of the universe. However, the book had a much more far-reaching influence. Lemay shows how its message that women were evil, lascivious

creatures built on the misogyny of the work's Aristotelian sources and laid the groundwork for serious persecution of women. Both the content of the treatise and the reputation of its author (erroneously believed to be Albertus Magnus) inspired a few medieval scholars to compose lengthy commentaries on the text, substantial selections from which are included, providing further evidence of how medieval men interpreted science and viewed the female body.
